OUR beautiful illustrated Catalogue of TREES, SHRUBS and ROSES may be had on application. Now is the time to plan for both Fall and Spring, as many Trees, Shrubs and Roses start so early that they do much better planted in Autumn. September is the time to plant "The Old-Fashioned Flowers," August for Evergreens, and October and November for Bulbs, Shrubs, Trees, etc.

### How and When to Plant Bulbs

ULB-PLANTING out-of-doors should be as early as the middle of October for best results, and even earlier. In the case of Lilium candidum, Iris, Colchicum and Narcissus, September is none too early. Dutch bulbs should be planted evenly about 6 inches to the bottom of the bulb, in well-prepared soil. Lilies should be 8 to 10 inches below the surface. If planted at uneven depths, they will not bloom evenly. After the ground is frozen, cover the bed with leaves or stable litter to the depth of 6 inches, and remove it early in the spring. Bulbs may be left in the ground and will bloom just as well the second year. If the bed is used for Geraniums, Salvias, or other bedding plants (except those with large roots, like Cannas), the bulbs need not be disturbed by setting the plants between

them after the blossoms are gone. The leaves of bulbs will soon die down, leaving the bedding plant alone in sight.

It has been my practice, since I began to import bulbs fifteen years ago, to buy for my customers the very best stock grown, believing that Americans are not only as appreciative of the best, but also as able to pay for select bulbs, as are the people of Europe. The result is that I have built up a magnificent trade amid the fiercest competition among large dealers, many of whom have yielded to the cry for cheap bulbs. To secure the low prices at which I offer these choice, picked bulbs, orders should be placed early, as they are filled in rotation. You need not pay, of course, until delivery of the bulbs. My method of securing the BEST AT LESS THAN THE PRICE FOR COMMON STOCK is worth a trial by all who buy bulbs in any quantity.

#### FORCING BULBS

Tulips in pots make a magnificent display if ten or twelve bulbs of one variety are grown in an 8-inch pot or seed-pan, or seven bulbs in a 6-inch pot. Any good garden soil does very well, but the best consists of three parts of fibrous loam, one part of well-rotted manure and one part sand. Place a piece of broken pot or coal over the hole, fill the pot about two-thirds full of soil, and jar it down somewhat; set the bulbs on this soil about the same distance apart and cover them to the depth of an inch, pressing the soil around them firmly with the hand. Soak with water and set the pots away in a dark, cool room, where they should not be allowed to get dry (they may need watering once in two or three weeks); or dig a trench in the garden, set the pots in and cover with coal-ashes to the depth of several inches. Before the ground freezes, place over them a good depth of coarse manure or leaves to keep from freezing, so that the pots may be brought into the house as wanted. Do not bring them into a very warm room.

HYACINTHS, CROCUSES, NARCISSI, etc., should be treated in the same way, except that the crowns of the Hyacinths should not be covered. Hyacinths should be planted singly in 5-inch pots, or three or four in 7- or 8-inch pots. Successful bulb culture depends upon getting roots well established in the pot at a low temperature of 40 to 50 degrees before bringing them into a temperature of the living-room to form the tops. New pots should soak in water over night before using.

We guarantee our bulbs equal to any imported, no matter what claims are made or prices asked

## **TULIPS**

#### DUC VAN THOL TULIPS

These Tulips, being the earliest of all, are used for forcing before the others may be flowered. The flowers are smaller than those of other Tulips.

Yellow Rose. Splendid golden yellow; large, full, double	20	I 50

### LATE SINGLE BEDDING TULIPS

No description can do justice to these beautiful Tulips. They bloom much later than the Early Tulips and are exquisite for cutting. They will last in vases for several days. Their popularity is noted by the increasing demand for them. One order often brings a larger one the next year. The prices have been quite high, but, at the low rate offered this year, no garden or border should be without them.

A Field of Single Red Hyacinths, Gertrude

## FIRST-SIZE SINGLE HYACINTHS

These thirty kinds are the cream of more than three hundred varieties grown. Being of the best forcing varieties and strictly first-size, they are usually sent out as Exhibition Sizes, Special Collections, etc. The Single Hyacinths have more meritorious habits than the double. Guaranteed best quality; equal to any imported

In many varieties four bulbs will weigh a pound.

Not less than 4 of a kind at 10, and 25 at 100 rate

#### BEDDING OR FORCING SECOND-SIZE

These are of the best maturity and of good size, especially adapted for forcing or bedding. They are sure to produce large and vigorous spikes of bloom. Plant 6 to 9 inches apart and 6 inches deep.

This is equal to "First Size" of many dealers. High-grade is shown by the fact that my SALES FOR THIS SIZE HAVE INCREASED YEARLY FOR FORCING as well as for bedding.

Roman Hyacinths

#### FRENCH ROMAN HYACINTHS

A charming class of Hyacinths, producing graceful, delicately perfumed spikes of flowers; they force readily in the house. Each bulb produces several spikes. Their treatment is the same as that of other Hyacinths. The white variety is used by the million for early bloom. Potted in September, they will flower in December. The

whole success of pot culture with these, as with Dutch Hyacinths, tulips, narcissi, etc., depends upon getting roots well established in the pot at a low temperature of 40 to 50 degrees, before bringing them into a temperature of the livingroom to force the tops.

### **CROCUSES**

Crocuses should be more used than they até. They are entirely hardy and increase from year to year. They are the first to flower after the snowdrops, and make a magnificent show in the grass, as well as in the border. When a large number are to be planted, proceed as follows: With the spade cut the sod at right angles; turn it back on a hinge (as it were), putting in a few bulbs around the sides of the hole; turn the sod back and tread firmly. Planted with Scilla Sibirica, a fine show is produced.

Crocus

#### SELECT NAMED CROCUSES

75 cts. per 100, \$6 per 1,000, except where noted

Mixed Crocuses are not, in my estimation, worth planting, hence I offer none, since a first-class named bulb will give three times as many flowers of larger size than those of a small-sized bulb generally sold in mixtures. "The best is the cheapest."

#### BLUE

**Albion.** Large; dark purple; very early; extra. **Baron Bruno.** Magnificent dark blue; large flower. Non Plus Ultra. Blue, bordered white.

#### WHITE

King of the Whites. New; choice. Mont Blanc. White; very fine. Queen Victoria. Extra.

#### YELLOW

Mammoth Bulbs. 85 cts. per 100, \$7 per 1,000.

#### STRIPED AND VARIEGATED

Albion. Striped; extra.

Mme. Mina. Extra large; splendid; the earliest.

Sir Walter Scott. White and violet-striped; very fine.

White, Yellow, Purple, Blue and Striped, equal number of each color, selected bulbs, XXX size of sorts named above at \$6 per 1,000, \$55 per 10,000.

### NARCISSI (Daffodils)

Trumpet Narcissi, Bicolor Victoria

No spring flower is more charming and none more easily grown than the Daffodil. They are all grand forcers, and out-of-doors they im-prove from year to year if let alone. Naturalized in the grass or open woods, they make a fine distant effect. The leaves ripen and disappear before mowing-time. "Ten years ago," says an English writer, "I planted many thousands of Narcissi in the grass, and they have thriven admirably, bloomed well and regularly, the flowers are large and handsome, and, in most cases, have not deteriorated in size. ALL LARGEST SIZE BULBS.

#### SINGLE TRUMPET DAFFODILS

	10	100

#### GARDEN LILIES

Candidum (Madonna, or St. Joseph's Lily). THICK-PETALED variety. Coming into bloom with the roses and blue larkspur, what a pageant the roses and blue larkspur, what a pageant they form. This Lily is easy of culture, quick to increase, and thrives in almost any soil and position. Like other Lilies, they should not be disturbed. Plant in early September for best results. Choice bulbs, \$1 per doz., \$7 per 100; mammoth size, \$1.25 per doz., \$8 per 100.

**Japanese Lilies** may be planted in spring or fall with excellent results. They are especially appropriate for garden or border of old-fashioned flowers, including the Tiger Lily. The following varieties are choice and easy of culture:

Auratum. 8 to 9 inches, \$1 per doz., 9 to 11 inches, \$1.50 per doz.

Speciosum album. 8 to 9 inches, \$1.50 per doz; 9 to 11 inches, \$2.50 per doz. Speciosum rubrum. 8 to 9 inches, \$1.25

per doz.; 9 to 11 inches, \$2 per doz. Speciosum Melpomene. 8 to 9 inches,

\$1.20 per doz.; 9 to 11 inches, \$2 per doz. Tigrinum splendens. Choice bulbs. \$1 per

doz., \$7 per 100. Twenty bulbs of each of these five sorts, largest size, 100 in all, \$12; next size, \$9

#### LILY-OF-THE-VALLEY

(Ready in November)

I cannot too highly recommend my Lily-of-the Valley. If more of my customers were aware of the abundant bloom the clumps give (with no care except to set them out) I am sure sales would be greatly increased.

XXX Grade. Berlin Pips. For Christmas forcing. \$2 per 100, \$16 per 1,000.

XXX Grade. Berlin Pips. A high grade for late forcing. \$2 per 100, \$14 per 1,000

Strong clumps for outdoor planting, containing 12 to 15 crowns, \$3 per doz., \$20 per 100.

#### THE TESTIMONY OF A SATISFIED CUSTOMER

Mr. S. G. Harris, Tarrytown, N. Y. Dear Sir.—It is a pleasure, I can assure you, to state that all of the bulbs, peonies and roses which I have purchased from you from time to time have proven most satisfactory dealings with you, and I assure you it has always been gratifying for me to be able to turn a great many people in your direction.

Wishing you the success which I feel you deserve, I remain,

Yours very truly.

## IRISH ROSES

not more than one hundred are worth growing in any given locality, unless one has a very large Rose garden. Some varieties do well in one section, some in another.

When we say we have only first-class varieties and first-class plants of all colors of Roses, including several of the best yellow sorts, we are prepared to back up our statements; and, as the Rose has long been acknowl-edged the "queen of flow-ers," and has held its place as such among nearly all flower lovers, we have spared

Lady Gay, an Improved Dorothy Perkins

no pains to provide our customers with heavy two- and three-year-old plants, which will produce grand blooms the first season. We offer several thousand plants, grown by Dickson & Sons, of Ireland, including Killarney, Mildred Grant, Harry Kirk, Frau Karl Druschki, Mrs. David Jardines, etc.

That we have succeeded in pleasing the public may be seen from the increased demand and the many letters of commendation from our customers.

#### PRICES OF ROSES, SPRING, 1910

All Roses offered in our General Catalogue, including Climbers, Rugosas, Sweetbriers, Hybrid Perpetuals, Hybrid Teas, etc., not named below, will be furnished at 35 cts. each, \$3.50 per doz., \$25 per 100.

On all Roses prices are: 6 at dozen rates, 50 at 100 rates, provided not less than three of a kind are ordered. No charges for boxes or packing.

### Buyers Please Bear in Mind

These prices are not for home-grown or Holland stock. Irish Roses are as much superior to ordinary stock as superior soil and climate and 50 years' training in Rose-growing can produce. To produce such stock, strong one-year plants are set in spring and grown two years in the field; quite different from plants started in the greenhouse in winter, planted out in spring and sold the following spring for two-year-old plants. The fact that we send these Irish Roses to nearly all the large estates at Lenox and Newport, where the gardeners are known to be as well up in their profession as any in the country, is proof positive of the quality of our stock.

The plants are very low budded, so that in planting the bud or graft is easily placed 2 or 3 inches below the surface of the ground (as it should be) without the necessity of too deep planting of the roots.

In addition to the Roses named below, we offer over one hundred and fifty choice varieties, including FRAU KARL DRUSCHKI, MRS. CRAWFORD, ULRICH BRUNNER, BEN CANT, BARON ROTHSCHILD, etc. Two-year selected plants, 35 cts. each, \$3.50 per doz., \$25 per 100. Write for General Catalogue.

New Roses, \$1 each

Hybrid Perpetuals Baroness Rothschild Bent Cant Clio Francois Michelon Frau Karl Druschki Marie Baumann Mrs. Crawford Mrs. John Laing Paul Neyron Malmaison Zepherine Drouhin

We also have a splendid stock of Standard Crimson

Rambler, Baby Rambler and Dorothy Perkins on Rugosa stock at the following prices, namely: Crimson Rambler, 2-yr., 75 cts.; 3-yr., \$2; 4-yr., \$3. Dorothy Perkins, 2-yr., \$1.50; 3-yr., \$2.50. Baby Rambler, 2-yr., \$1; 3-yr., \$1.50.

#### ROSA RUGOSA RUBRA

Having a fine stock of this most excellent Rose for shrub effect and for hedge, we offer plants at the fol-lowing low rates, namely: 2-yr., 25 cts. each, \$2.50 per doz., \$15 per 100; 3-yr., 40 cts. each, \$4 per doz.

#### CLIMBING ROSES

We would call special attention to our list of Climbing Roses which is not duplicated by any dealer in the country. Of many varieties of Climbing Roses, including Dorothy Perkins, Crimson Rambler, Setigera, Lady Gay and others, we have a fine stock of 3-yr. plants at 50 cts. each, \$5 per doz.

## HARDY PERENNIALS

#### DELPHINIUMS

We would call attention to our large stock and great variety of Delphiniums (Larkspur). Our enthusiasm for the Erskine Park Hybrids has led us to prepare an immense stock. offer prices on page 15.

#### IRIS

Among all hardy perennials there is no family which has a greater variety of choice flowers more easily grown than the different groups of Iris. Our Gen-eral Catalogue gives a long list of those which have been well tested and proven to be the best grown.

### German Iris LARGE STOCK, LOW PRICES, GOOD ROOTS

In addition to the superb list in our General Catalogue, we offer the following choice varieties, all large enough to bloom next May and June, viz .:

Albert Victor. Beautiful lavender and blue. Garibaldi. Fine rosy pink. Her Majesty. Lovely rose-pink; falls crimson. Leonidas. Rosy mauve. Pallida Dalmatica. Very large fine lavender for

Queen of May. Lilac, almost pink; very beautiful. Rutherford. Shade a little lighter than Dalmatica.

15 cts. each, \$1.50 per doz.; 25 cts. each, \$2.50 per doz. Prices of all other German Iris: Mixed, 75 cts. per doz., \$5 per 100, \$40 per 1,000; Named, \$1 per doz., \$7 per 100, \$60

### Spanish Iris (Xiphoides)

These choice early Irises give more flowers for the money than any other Iris. By covering the bed with glass in the beginning of April, the flowers may be cut in May. Without glass, they bloom in early June

Baron von Humboldt. Fine blueso	50
Belle Chinoise. Very fine yellow	7.5
British Queen. Pure white; extra	7.5
<b>Chrysolora.</b> One of the best pure yellows	50
Count of Nassau. Best dark blue; sweet-scented	90
<b>Emperor of the West.</b> Bronze; large flower	7.5
La Tendresse. Cream-white	65
<b>Louise.</b> Lilac-blue; very large; extra fine	7.5
Leander. Deep yellow; very large flower;	, .
scented	90
Superfine Mixed. From above sorts	65

#### English Iris (Anglica)

These beautiful flowers are second only to the Japanese in beauty, and some think they are even more graceful, not being so heavy. The markings are exquisite. They come in bloom after the German Iris and before the Japanese. We offer ten Grand Sorts at 50 Cts. PER DOZ., \$2.50 PER 100, AND MONT BLANC, THE FINEST WHITE, AT 50 CTS. PER DOZ., \$2.50 PER 100; VERY FINE MIXED, \$1.50 PER 100.

Those interested in German or Japanese Iris should send for list of choicest imported varieties

Phlox, Miss Lingard, in 'our Nursery

### **PHLOX**

Following the Iris and Peonies in time of bloom, but in no way behind them in popularity, are the Hardy Perennial Phloxes. We have finally succeeded in getting up a good stock of some of the varieties which are always short at planting time. We have weeded out all the magentas and purples and believe that our list is as select as that offered by any firm. The season having been favorable, our stock will be especially fine for September and October planting.

Amazon. Large flower; pure white. Fine.
Belvidere. Salmon-pink. A choice sort.
Bridesmaid. White, with large crimson center.
Beranger. White, suffused with pink; rosp lilac eye.

Caran d'Ache. Bright carmine-rose; distinct. Coquelicot. Fine, rich scarlet, with deep carmine eye. Cross of Honor. Each petal lilac-color, with a white

margin; beautiful. Flambeau. Large flower; bright orange-red, dark center; fine.

Henry Murger. White, with carmine eye. The best of its color.

La Vague. Large; rosy pink, with red eye; choice. Lothair. Large; rosy salmon, with crimson eye.

Matador. Large flower; bright orange-red. Distinct

and fine.

Professor Schlieman. Salmon-rose, with carmine

Pantheon. Deep salmon-rose; very fine. Peachblow. Delicate pink, with white markings.

Pearl. Pure white. Purity. Snow-white. Queen. Pure white.

Pecheur d'Islande. Soft salmon-scarlet, white center.

R. P. Struthers. Bright rosy red; crimson eye. Sunshine. Deep salmon-pink; dark eye.

Wm: Goethe. Tyrian-rose, suffused with carmine-lake. Miss Lingard. We offer a fine stock of this new, everblooming variety. This Phlox blooms in May, fully six weeks earlier than the other sorts, and continues in bloom three months; a grand white variety, which should be in every collection; is not so tall a grower as Queen.

Phlox subulata (Moss Pink). Rose-pink. subulata alba. White.

Blooming size, 15 cts cach, \$1.25 per doz., \$8 per 100. Large clumps, XX, 20 cts. each, \$2 per doz., \$15 per 100

Peony, Modeste

1st prize awarded us for 50 blooms at meeting of Am. Peony Society, 1909

### **PEONIES**

No flowers exceed the Peonies in popularity, and none is more easily grown. They are not attacked by insects or disease, and are perfectly hardy, requiring no covering in the severest weather. They thrive in all kinds of soil and flourish in a rich, deep loam. They demand much moisture at blooming time, and if grown in partial shade the blooms will, therefore last longer and be equally fine in other respects. Plant eyes 2 inches below the surface and pack the earth firmly about the roots.

Although they may be planted in spring or late fall, best results are obtained if planted in Sept., as the plant becomes sufficiently established to mature the bloom the following June.

#### A Word About Varieties

Our stock was originally purchased of tour of the most reputable growers known to the trade, and by careful handling in planting, digging and shipping our customers may rely on varieties true to name.

The best customer on our books was secured years ago by an order for \$10 worth of Peonies, our selection.

We have discarded many varieties which we consider unworthy of cultivation, retaining other varieties much better of practically the same color. There have been originated nearly 3,000 varieties of Peonies, many of which have long since been discarded by most of the growers as unworthy of cultivation. There are still many varieties offered in some localities which within two or three years will be a thing of the past. Such beautiful varieties have been brought out during the past few years, since the revival of the herbaceous plants, that it seems useless to continue a large list of old varieties not half so good, either from lack of distinct and beautiful color, size, vigor or

other good qualities. It was the consensus of opinion at the meeting of the American Peony Society held at Cornell University in June, 1908, that 100 to 150 varieties would cover all that would be worth growing, including early, medium and late varieties of the different colors from white, yellow, pink, rose, scarlet and purple. We believe we have a list which will need but little revision, simply a few more additions of the sorts recently introduced.

### Preparation of the Soil

To perfect so many large blooms as a good clump of Peonies will set, the soil should be well prepared so that plenty of nourishment as well as moisture may be had at blooming time. No fertilizer is better than well-rotted cow manure, which should be used in liberal quantities, but placed far enough below the roots so that the rootlets will not be affected by it until they have well started to grow. If the subsoil is of a good loamy texture, the excavation of 2 feet with a layer of 6 inches of well-rotted cow manure at the bottom, well spaded in, will be sufficient. If, however, the subsoil is of the nature of hardpan, it should be removed entirely and alternate layers of old sods and manure put in its place. Heavy clay should be lightened by the aid of sand, leaf-mold and manure, mixing it thoroughly by overturning several times. Plants should be set at least 3 feet apart so that they will have ample room for development.

A good way to utilize the ground the first season or two is to plant a row of phlox between the rows of Peonies. Should there be an extreme drought in April or May, a thorough drenching of the beds once or twice a week would well repay in extra bloom. As phlox are fond of the same treatment, these plants thrive well together, the latter giving a succession of bloom for two months after the Peonies are over.

#### A Word About Prices

We have endeavored to make our prices so attractive as to bring many orders for our large stock. From strong divisions of three to five eyes, our plants are grown one, two and three years before sent out. Every one of our plants will bloom next June and July if planted in early autumn. Grown on ground especially adapted to Peonies, and in a very favorable season, our plants have developed strong roots and plump eyes. Prices on application for divisions.

Three of a kind at dozen rate. Discount of 5 per cent on orders from \$20 to \$50; 10 per cent on orders for \$50 or more

## One Hundred Superb Peonies

We were awarded two first prizes in June at the annual exhibition of the American Peony Society

The quality of our stock may be seen from the fact that we supply many of the most noted places. We guarantee our varieties true to name. Not trying to grow a great variety, and making this our leading fall specialty,

One of our Fields of Peonies

we are able to keep our varieties pure. We have spared no expense to make our plants strong and healthy, giving them the most careful culture on ground well suited to their nature. The expressions of delight from the many people who visited our fields in June (some of them coming several hundred miles in response to our invitation) prove the great popularity of the choice varieties we cultivate. One who has not seen some of the newer varieties could scarcely imagine how delicate their coloring, how beautiful their form, how magnificent their size, how delicate their perfume. By selection of

their perfume. By selection of the early, medium and late-blooming varieties of the different shades of white, yellow, flesh, salmon, rose, crimson and purple, one may enjoy a feast of peonies for a month, beginning with Sarah Bernhardt, Grandiflora carnea plena and ending with Dorchester, Humei, Livingstone, Purpurea superba, Marie Lemoine and Madam Lebon, ushering in the Japanese Iris and the early phloxes. Plant in autumn, and one year from date your plants will be worth nearly double their cost.

#### SINGLE JAPANESE

They measure 6 to 7 inches across. Twelve varieties of the very finest in cultivation, including all the delicate shades from pure white to purple. 50 cts. each, \$5 per doz

#### DOUBLE CHINESE

Hardy as an oak, thriving in any rich soil and with the least possible care. The choice double varieties named below should be in every garden. Heavy clumps which will bloom the first season.

#### HARDY PERENNIALS

A Word About Prices. We offer hundreds of the best varieties of Hardy Perennials, including Asters, Chrysanthemums, Columbines, Ferns, Hollyhocks, Larkspurs, Lilies, etc., at the few varieties named below differ from this price.

We have greatly increased our facilities for supplying the old-fashioned flowers, including improved new hybrids and many varieties especially adapted to the Alpine and rock-garden.

Prices of all Hardy Perennials listed in our Catalogue, not named on this page, will be furnished at 15 cts. each, \$1.50 per doz.

Six at dozen rates, 50 at 100 rates, provided not less than three of a kind are ordered. No charge for boxing and packing orders amounting to \$5 or more

and because orders amounting to to at more

Hardy plants are a great specialty with us. Our list comprises hundreds of the best varieties. Our scheme for securing fine effects in color and continuity of bloom will delight you, as it has many

Prices and Discounts. The prices of trees and shrubs which follow, and extra sizes on page 19, include boxing and packing. The reason the price of the single plant seems higher in proportion is that the cost of packing a single plant is often as much as for several. On wholesale orders for 10 or more of a kind and size, therefore, we are prepared to make a liberal discount as follows: 10 to 50 plants of one kind and size 20 per cent, 50 to 250 plants of one kind and size 25 per cent, from the single rates where the price per 10 and per 100 is not given.

On orders for assorted lots of one to ten of each kind and size, we will give the following discounts from the rate of each, namely: Orders amounting to \$10 to \$20, 5 per cent discount; \$20 to \$50, 10 per

cent; \$50 to \$100, 15 per cent; \$100 up, 20 per cent.

#### **EVERGREEN TREES**

All our Evergreen Trees have been transplanted several times, so that they have developed ample fibrous roots to transfer in safety from our grounds to yours. We take great care, also, to burlap the roots in a large ball of earth, except cheap and small sizes. Among many species we offer are some of the cheaper sorts for screens and hedges: also, choice specimens of the more rare and beautiful Colorado Blue Spruce, Oriental Spruce, Nordmann's Fir, White Pine, Mugho Pine, Swiss Stone Pine, Japanese Umbrella Pine, Arborvitæ, Hemlock, Retinosporas, Junipers, etc. We invite correspondence with those desiring to plant Evergreen Trees, and offer information as to proper time and method of handling the different species. Special estimates for large numbers. See General Catalogue.

Estimates cheerfully furnished on Rose Gardens, Hardy Gardens, or general lay-out of estates, by our Landscape Department. Special prices on larger quantities and on small sizes for forestry. Our Catalogue, illustrated from photographs, accurately describes nearly 200 varieties of Roses and hundreds of the best Shrubs, Trees, Perennials, Gladioli, Dahlias and Fruits.

# Planting Plans and Our Superior Stock

The Garden Beautiful requires proper care and cultivation, but equally depends upon intelligent selection of varieties and harmonious design in planting. Neglect of any of these points will give a garden lacking in some element of beauty. We make

a specialty of Designs for Suburban Grounds and have furnished plans for many of the most beautiful places near New York City. Planting designs we supply to distant customers uniformly give complete satisfaction,—they are practical and easy of application.

We not only furnish first-class material at the proper

season for the best results, but we are prepared to renovate old estates, make planting plans for new ones, and in many other ways assist our patrons to the highest development of their grounds. To those in the vicinity of New York we make a preliminary visit without charge. Those at a distance should send us a sketch of their grounds with dimensions, points of the compass, location of buildings, trees, etc.

From these data we make a planting plan, drawn to scale, at a moderate cost. By so doing, our clients would save expense and disappointment, because, without expert advice, planters are apt to select material for planting which is either not hardy or will not thrive in a given location. Moreover, those not familiar with the ultimate sizes of trees, shrubs, etc., are apt to use two or three times the number required for the best effect. Many buyers find our superb catalogue sufficient to help them in selecting material, for we have spared no pains to make it as helpful as possible, and are supplementing it by correspondence, answering inquiries and suggesting proper selections.

To those contemplating a large planting, we wish to call attention to the fact that we have filled some of the largest orders known among nurserymen. In the last five years we have supplied one large estate in this vicinity with over 31,000 trees, besides shrubs, bulbs, etc. The fact that this number of trees has been largely evergreens,

which are more difficult to transplant than deciduous trees, is pretty good proof that our stock bears transplanting well.

From one of the most noted rosarians in the country we have received an order for as many as \$1,200 worth of rose plants at one time.

We completed this year, to the entire satisfaction of our client at Lenox, Mass., a job of grading, road-building, seeding and planting to the amount of several thousand dollars.

S. G. HARRIS, M.S., Tarrytown, N. Y.
